SUBJECT: Citations for Responses to Requirements on RD-C-1828,
10 March 1958.

1. In February 1958, this Branch initiated requirements against a reported highly important Communist Bloc (including Mongolia, North Korea, and North Vietnam) conference held in Moscow in December 1957 on the subject of telecommunications. These requirements became identified as RD-C-1828. Between that time and now 20 important CS responses have been received relating to that requirement.

25X1X7 2. The importance of these responses is reflected in the attached write up. It will probably be published as a Current Support Memorandum or as an item in an OCI periodical. The material will also be used for a scheduled formal project (No. 46.2322) on intra-Bloc telecommunications to be done later this fiscal year. Further, the write up will probably be presented as a discussion paper at the economic sessions of a [REDACTED] conference on Electronics to be held in Ottawa in January, provided it can be downgraded to ~~SECRET~~ as already requested.

3. The collection performance on the part of St/I/R and of DD/P on RD-C-1828 has indeed been timely, effective, and fruitful. It would be appreciated if you would convey our appreciation to those in both offices who are responsible for this good work. It is hoped that collection on this requirement will continue to be so successful.
